FEDERLEGNOARREDO

I pannelli di legno rappresentano la principale materia prima per la costruzione di mobili, motivo di orgoglio dell'industria manifatturiera nazionale e simbolo del design e del Made in Italy nel mondo. La filiera nazionale del legno arredo oggi impiega **350.000** addetti e genera un fatturato di **37 miliardi di euro**, operando nella consapevolezza che il legno è una risorsa tanto

preziosa quanto scarsa, che va quindi valorizzata attraverso il suo riuso e riciclo fin quando possibile. Oggi quantità sempre maggiori di questa importante risorsa vengono sottratte alla produzione di pannelli ed impiegate come combustibile per la produzione di energia elettrica incentivata, non riconoscendo le logiche di un più corretto uso a cascata del legno.

I produttori italiani di pannelli di legno salutano con grande apprezzamento la recente lettera con cui **500 scienziati mondiali** richiedono alla Presidente della commissione Europea Ursula von der Leyen e al Presidente degli Stati Uniti Joe Biden la cessazione dei sussidi e degli incentivi per la combustione del legno nelle centrali a biomasse.
